

Texas Refinery Corporation Relocation

Location: 840 N. Main Street
Fort Worth, TX

Size: 72,000 SF

Description:

The Trinity River Vision project forced the relocation of Texas Refinery blending operation from North Main in downtown Fort Worth. Panther RES was selected to manage the Phase I conceptual and Phase II final design efforts for the new facility. Panther RES has recently been chosen to lead the Construction Management when the project begins in earnest early in 2012. Systems Integration, Inc. of Arlington was selected as the process engineer and Daniels and Lovelady was selected as the architects.
